TURN OFF PAPER

70% to 80% Paper Turn-Off over 3-Years Compared to 15% Industry Average!

CUT MAJOR EXPENSE

On average, every paper bill represents \$1.21 in total operational cost. Our clients enjoy as low as 10-cents in operational cost per bill.

GET PAID FASTER

On average, our clients are getting paid 11-days faster than paper bills & 8-days faster than those mainstream "e-bill" methodologies.

GO GREEN

For most companies, eliminating paper-waste represents the single biggest opportunity to reach green initiatives & reduce carbon footprint.

CROSS-SELL

Intelligent marketing personalized to the recipient allows billers to automate their cross-selling efforts while tracking consumer activity.

RETURN RECEIPT

E-Certification by the United States Postal Service provides an inexpensive way to track, trace & prove not only receipt but also view history by the intended recipient.

Turn Off Your Paper with e-Billing by Streamline

Push™ Technology

Our Push™ solutions are by far the most sophisticated & impactful systems available today. When it comes to paper turn-off & electronic billing systems as a whole, less than 15% of bill-payers actually turn off paper when given an alternative. Utilizing Push™ technology, our clients are experiencing 70% to 80% paper turn-off within 3-years of implementation. There are three simple reasons. The 1st & most important is bill-payer convenience. It's easier than any alternative bill-paying method from the customer-perspective. The 2nd is our expertise in driving your customer-conversion. The 3rd is security & deliverability. Our electronic bill is Certified by the United States Postal Service. Other benefits include sophisticated tracking, tracing & analytic reports, marketing & cross-marketing personalized to the recipient, optimization for mobile devices, OFFLINE functionality & because it's SaaS, there's nothing to buy, build or maintain. Is Push™ right for your company? Generally speaking, Push™ technology is a **MUST** for **ANY** company or organization processing 10,000 or more B2B bills monthly or 100,000 B2C bills per month. At this volume, there's no alternative.

Cloud™ Technology

Invoice Cloud™ provides electronic invoice presentation and processing by providing a secure, PCI compliant, web based infrastructure, branded for each billing entity, and three distinct interfaces. Open source web services are the foundation for the utilities used for import, export and invoicing. Similar to Push™ technology, custom-branded invoices are conveniently & automatically presented to the customer via email. The key difference is the bill-payer is then redirected to your custom-branded payment portal instead of paying inside of the email itself as they would in a "push" solution. Our clients also like the fact that there's no upfront investment or contract-commitment making Cloud™ solutions completely risk-free. Is Cloud™ technology right for your company? Any organization that processes bills in either hard copy form, electronically or both can benefit from Cloud™ technology. For those companies & organizations processing **less than** 10,000 B2B or 100,000 B2C bills per month & looking for zero-risk in implementing an electronic solution, Cloud™ technology is your optimal choice.

The Push™ E-Bill Attachment

The electronic world of billing & payment are evolving at a rapid pace & will not slow down anytime soon. Streamline Group is dedicated to staying abreast of the latest trends, technologies & regulations but also maintaining a diverse solution portfolio so none of **our clients** get left out in the cold. Many other solution-providers are hedging on the success & longevity of their specific product or technology-type. This is risky. As a biller, you need to know that the bills will go out no matter what the future holds. This is one of the many things that make Streamline Group unique.
